

# CARLOS FIGUERA LA RIVA

## Mobile Application Developer

Toronto, Ontario, Canada | carlos.figuera@example.com

LinkedIn: linkedin.com/in/carlosfiguera | GitHub: github.com/carlosfiguera

### PROFESSIONAL SUMMARY

Mobile application developer with a unique background combining business administration and design expertise. Specialized in React Native development with focus on accessibility, healthcare technology, and user-centered design. Proven ability to deliver scalable mobile solutions with clean architecture and exceptional UX. Strong foundation in full-stack development, database design, and agile methodologies.

### EDUCATION

#### Advanced Diploma in Mobile Application Development (T177)

2024 - 2026

George Brown College, Toronto, Ontario

- Specialized in iOS and cross-platform mobile development using React Native and Swift
- Advanced coursework in full-stack development, database design, and cybersecurity
- Capstone project: MoviCare senior care mobile application

#### Master's Degree in Design

Completed

- Focus on user experience design and design thinking methodologies
- Human-centered design principles and prototyping

#### Bachelor's Degree in Business Administration

Completed

- Business strategy, project management, and operations

## TECHNICAL SKILLS

---

### Mobile Development

React Native, Expo Router, iOS (Swift, UIKit, SwiftUI), React Navigation, Firebase, Firestore

### Full-Stack Development

JavaScript, TypeScript, Node.js, Express, MongoDB, Mongoose, RESTful APIs, Socket.io

### Design & UX

UI/UX Design, Accessibility Standards, Wireframing, Prototyping, Design Systems

### Data & Tools

Python, TensorFlow, Pandas, Git, GitHub, Linux, Network Security, SQL/NoSQL

## KEY PROJECT EXPERIENCE

---

### MoviCare - Senior Care Mobile Application

2025 - 2026

*Mobile Developer | Capstone Project*

- Led mobile development for React Native application serving seniors, family members, and caregivers
- Implemented role-based authentication system with Firebase and secure Firestore data persistence
- Developed real-time notification system for medication reminders and emergency alerts
- Built location-based check-in feature with Expo Location for senior safety monitoring
- Created health metrics tracking system including BP monitoring, BMI calculation, and medical conditions management
- Designed and implemented accessible UI components following WCAG guidelines
- Collaborated with team using Git, agile methodologies, and regular sprint reviews

### Full-Stack Real-Time Chat Application

2025

*COMP3133 - Full Stack Development II*

- Built real-time chat application using Socket.io, Express, and MongoDB
- Implemented user authentication, private messaging, and group chat functionality
- Designed RESTful API with comprehensive error handling and data validation

### iOS Calculator Application

2025

*COMP3097 - iOS Development*

- Developed native iOS calculator using SwiftUI and UIKit
- Implemented advanced state management and custom UI components
- Applied iOS design patterns and Human Interface Guidelines

## Machine Learning Predictive Models

2025

*Deep Learning Lab*

- Implemented neural networks for automotive fuel efficiency prediction using TensorFlow
- Developed IMDB sentiment analysis model with Keras
- Performed data preprocessing and feature engineering with Pandas and NumPy

## ADDITIONAL EXPERIENCE

---

### Microservices Architecture Implementation

2025

- Designed fault-tolerant microservices with circuit breaker patterns
- Implemented scalable backend architecture using Node.js

### Network Security & Penetration Testing

2025

- Conducted network reconnaissance and security auditing using nmap and traceroute
- Configured and hardened SSH security protocols

## LANGUAGES

---

English (Fluent), Spanish (Native)
